Vacuum Interrupters Introduces the RVI-WL34999C Replacement Vacuum Interrupter

Farmers Branch, TX, November 24, 2021 — [Vacuum Interrupters](https://www.vacuuminterrupters.com), a leading supplier of replacement vacuum interrupters, pole assemblies, parts, and components for medium-voltage vacuum circuit breakers and contactors, introduces the [RVI-WL34999C](https://www.vacuuminterrupters.com) replacement vacuum interrupter.

This is a direct fit-and-function replacement unit that meets and exceeds original equipment ratings and is intended for use in select Square D type VR, Square D type VAD-3, and S&C type FVR vacuum circuit breakers. The RVI-WL34999C offers excellent high-voltage insulation, high cumulative and high breaking capacity, exclusive internal torsion control, and fine alumina ceramic for an excellent vacuum seal.

The vacuum interrupter offers 2000A rms rated current, 15 kV rms maximum voltage, 95 kV peak impulse withstand, and 40 KA rms rated short-circuit breaking current.

No modification is required for proper installation and operation in the existing electrical equipment. These replacement interrupters are also offered preinstalled in a complete pole assembly to match existing equipment and shorten downtime.

About Vacuum Interrupters

Vacuum Interrupters, developer of the Magnetron Atmospheric Condition (MAC-TS4) predictive vacuum interrupter test set, Circuit Breaker Timer (CBT-1201 and CBT-1202), and Vacuum Interrupter Integrity Tester (VITS60M and VITS75M) test systems, provides replacement vacuum interrupters, pole assemblies, and components for virtually all medium-voltage vacuum circuit breakers and vacuum contactors, and offers High Voltage Test Lab and SF6 interrupter rebuild/replacement capabilities. Learn more at [VacuumInterrupters.com](https://www.vacuuminterrupters.com) or call us at 214-442-5877.
