## Vacuum Interrupters Introduces RVI-5259C33 Replacement Vacuum Interrupter

Farmers Branch, TX, February 15, 2023 — [Vacuum Interrupters](#), a leading manufacturer of replacement vacuum interrupters, pole assemblies, parts, and components for medium-voltage vacuum circuit breakers and contactors, introduces the [RVI-5259C33](#) replacement vacuum interrupter.

This direct fit-and-function replacement unit for the Cutler Hammer/Westinghouse /Square D 5259C33 vacuum interrupter meets original equipment ratings and is intended for use in the 400A AMPGARD Vacuum Break SJ Series SJA50VW430. The [RVI-5259C33](#) is built to provide excellent high-voltage insulation, high cumulative and breaking capacity, exclusive internal torsion control, and an excellent vacuum seal thanks to a fine alumina ceramic.

The [replacement vacuum interrupter](#) offers 400 A RMS-rated current, 7.2 kV RMS maximum voltage, 60 kV peak impulse withstand, and 8.5 KA RMS-rated short-circuit breaking current.

No modification is required for proper installation and operation in the existing electrical equipment. Vacuum Interrupters can also provide assembly components and mounting hardware to aid in installation and shorten downtime.

### About Vacuum Interrupters

Vacuum Interrupters, developer of the Magnetron Atmospheric Condition (MAC-TS4) predictive vacuum interrupter test set, Circuit Breaker Timer (CBT-1201 and CBT-1202), and Vacuum Interrupter Integrity Tester (VITS60M and VITS75M) test systems, provides replacement vacuum interrupters, pole assemblies, and components for virtually all medium-voltage vacuum circuit breakers and vacuum contactors, and offers High Voltage Test Lab and SF6 interrupter rebuild/replacement capabilities. Learn more at [VacuumInterrupters.com](#) or call us at 214-442-5877.
